

Produce the most parts using the least material with the new **RAPID-AIR STAGGER FEED!**

Model STF6
(Patent pending)

- Enhances even the most simple die by feeding it diagonally, side-to-side, or in any pattern.
- Maximizes material usage by pre-programming the optimum pattern to reduce coil material waste.
- Take advantage of common stock widths or special material discounts.
- Simply change dies to produce any variety of circular or non-circular parts.
- Servo drive mounted on shuttle platform provides fast, accurate moves.
- Reliable, high-performance Rapid-Air servo offers quick changeover and speed unlike mechanical models.
- User-friendly Rapid-Air controls and in-house programming capabilities.
- Very low maintenance.
- Pilot release is included. Just add valve.
- No one can offer you a comparable package at such a low price!
